

STAFER S.p.A. (STAmppaggio FERramenta - Italian for metal hardware stamping) is a **medium-sized engineering company founded in 1960 in Faenza in the northern Italian region of Emilia-Romagna.**

STAFER is at the core of the mechanics industry in the Emilia-Romagna region, the productive heart of Italy, strongly linked to the craft tradition, where process and product innovations are developed that are indispensable for various industrial fields and within which there are some world leading historical companies.

STAFER is a business-to-business company specialized in the production of mechanical accessories for all types of manual operation and tubular motors for the electrical operation of rolling shutters.

Our product range spans from the octagonal steel tubes to the tubular motor 100% manufactured in Italy with Italian components, from hand crank gearbox and winch operations to profiles, end caps and guide rails for

rolling shutter aluminium boxes, including every single accessory needed for the installation of a rolling shutter as part of an architectural opening.

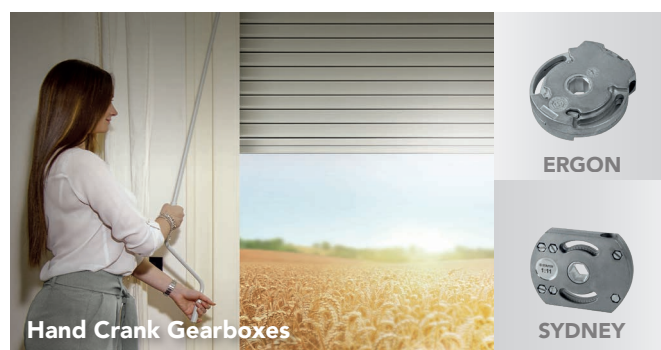

STAFER has grown steadily year after year thanks to its know-how and experience. It currently spreads over an area of over 25,000 square metres (17,000 of which are covered), and prides itself to offer a catalogue of over 3,000 items.

Today, STAFER is the benchmark in the field of rolling shutter accessories due to its long history, wide product range, flexibility and service. Starting from the Italian market, where STAFER is today acknowledged as the leader, the company has developed as a strong and reliable partner for companies throughout the Mediterranean area and today exports to more than 50 foreign countries, in all continents.

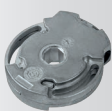

STAFER's success lies in its cooperative, customer-oriented approach and in the establishment of solid, long-lasting relationships.

OUR PRODUCTS

Over 3,000 manufactured accessories offer our customers the ability to customize the installation and the operation of all types of rolling shutters.

Hand crank gears, steel-wire winches, octagonal steel tubes, end caps and profiles for rolling shutter aluminium boxes and other mechanical accessories, along with tubular motors and controls entirely produced in our Italian factory, are a reference range of products for our sector and have allowed Stafer to establish itself as a worldwide Italian excellence.

OUR QUALITY

Every product, from the smallest to the largest, is engineered and manufactured by Stafer with the same care and attention that has distinguished the company for over 60 years. A production process capable of combining handcrafted tradition with the latest technologies allows Stafer to give its products a high quality standard.

Only through a careful selection of raw materials and components, entirely sourced in Italy, is it possible to guarantee a quality with a well-established Made in Italy tradition.

OUR SERVICE

Stafer protects the purchases of its customers by offering a warranty covering its entire range of products and follows their requests starting from the engineering stage, up to providing a professional technical support during the phases of installation and after-sales service.

Composed of competent and highly qualified experts, our Technical Assistance is able to guarantee Stafer customers the maximum timeliness and reliability.
